Dragon Medical Practice Edition 3: The front-end, real-time speech recognition solution

Challenge

How can clinicians efficiently document patient care in their own words, spending less time typing or clicking inside their EHR?

Solution

By using Dragon Medical Practice Edition 3, clinicians can efficiently navigate and dictate medical decision-making and treatment plans directly into a patient's electronic record. Dragon Medical Practice Edition 3 is the perfect desktop front-end speech recognition solution for the healthcare professional, from medical practices to primary care facilities and departmental working groups – easy to deploy, rich in end-user features and boosting information capturing directly in departmental information systems or EHRs.

Using Dragon Medical Practice Edition 3 ensures clinicians document care 'in their own words', and, therefore, more completely. They also save additional time by using customised macros to enter frequently-dictated text with a single voice command.

Overall, Dragon Medical solutions dramatically reduce the time clinicians spend documenting care – 30 minutes or more a day, according to a number of studies.

Key features

– **Improved Accuracy** Significant improvement in out-of-box accuracy compared to previous and non-medical versions.
– **New DragonBar** The newly designed DragonBar collapses automatically to take up less space on your screen when you're not using it.
– **Medical vocabularies** Includes vocabularies for medical specialties and subspecialties.
– **Transparent dictation window** A transparent screen makes dictating into Hidden Mode easy while viewing lab results, images and flow sheets.
– **Dragon medical template library** Includes library of macros for standard notes and 'medical normals' by body system.
– **Smart configuration** Automatically detects hardware resources. Its state-of-the-art technology takes advantage of advances in hardware and runs in multiple threads automatically when multi-core hardware is detected, for better recognition performance.
– **Recognition analytics** Automatically detects poor audio input and alerts the user, offering advice to remedy the situation and improve accuracy.
– **Flexible input** Use your iPhone® or Android® devices for speech input.
– **Application support** Dragon Medical Practice Edition 3 supports Office 2013®, Internet Explorer®, and Gmail®, Hotmail®, and Outlook.com® by introducing Rich Internet Application support.
