

Digitisation and Scanning of X-Ray Films

[Medical X-Ray, MRI X-Ray, Chest X-Ray, Dental X-Ray, Radiology X-Rays, Pipeline X-Ray]

* other formats available on request

At Pearl Scan we can scan a variety of sizes of x-rays from 2.5"x2.5" to 14"x35" [inches] and supply them as scanned images including DICOM, TIFF, JPEG, PDF or any other industry standard image format that you may require.

The Process

We collect or you dispatch to us

We can collect your x-rays from your office, hospital, surgery, practice etc. within 24 hours (for orders placed before 12:00pm) from nationwide locations (mainland UK) using our secure courier services or you can send your x-rays to us by secure, guaranteed next day Royal Mail post.

Sampling for your approval

Once we have received your x-rays, we will prepare a few samples from your collection and submit these to you electronically for your approval.

Scanning and processing

Once approved, we will start the scanning and processing of your x-ray films. Once scanned we will index them as per your specification of file name, indexing etc. for example each digital image will be named by the Reference Number, Name, Date, Location, Type, Description etc.

Delivery

Once completed, we will copy the scanned images onto a disk or an encrypted USB drive and dispatched to you with your originals.

Fast Track Service

If you require a quick turn-around service - our fast-track X Ray film scanning service can provide you scanned images of your x rays within 24 hours of receiving your xray films. Let us know at the time of your enquiry and we can scan and return your x rays the same day or within 24 hours.

Our Scanning x-rays to digital format service makes access, viewing, sharing and distribution of your medical films as easy as viewing and sharing digital photos these days.

Scanning x rays to digital file format also allows you the ability to use these images in projections, power point presentations, court rooms, etc. Scanning x-rays to digital format gives you many more options over traditional films usability. Scanned and digitized x-ray images can be easily viewed on any PC and can be shared electronically.

Our X-ray Scanning and Digital Imaging Services include:

- Scanning X-rays from film to disc in a variety of file formats
- DICOM, Jpeg, PDF, TIFF formats supplied
- Scanning X-Rays for exhibits or for digital projection displays
- 24 to 48 hour turnaround available for most small to medium volumes
- Additional Medical Records Scanning also available

We are committed to provide excellent image quality, standards and professional scanning services.
