

Introducing Lexacom Mobile

Dictate when and where it matters, with Lexacom Mobile. With Lexacom Mobile you can record, track and approve dictations wherever and whenever you like. Using secure, encrypted Cloud technology, Lexacom Mobile works with your office-based Lexacom 3 software to provide an integrated mobile dictation system.

At a meeting? Working from home? Visiting a patient or client? Record your thoughts and actions quickly and accurately with Lexacom Mobile – digital dictation at your fingertips. [READ ON...](#)

How it works

Simply tap the screen to record dictations on the move and send securely via the cloud for typing and dispatch.

- Record
- Edit
- Prioritise
- Send securely
- Track
- Review
- Approve

Pause, resume or edit as needed, set the priority, track progress, and review the final document – all from the Lexacom Mobile app.

Lexacom Mobile also offers a handy memo and reminder facility and even geotags your recordings with location details.

Getting Started

Lexacom Mobile is available to Lexacom 3 users (version 3.2.1.15 or later) for a modest monthly fee, which includes full integration with Lexacom software, software updates and ongoing technical support.

“

Being able to dictate on the move and when remote working, knowing my dictations will be treated exactly as if I had recorded them in the surgery, is a huge plus. The immediacy helps ensure accuracy and often my dictations are typed and approved for dispatch before I've even returned from visits! I have been one of the early adopters of this software and continue to find it reliable, effective with good support.

Micaela Young,
Denmark St Surgery, Darlington
