

Release valuable space, reduce staff workload and improve patient safety in your General Practice with our fully managed Lloyd George & A4 medical record digitisation service

What is noteSpace Digital?

noteSpace Digital is a fully managed digitisation service designed specifically for UK General Practice to meet the GMS contract commitments.

We securely collect, catalogue, and scan your Lloyd George or A4 paper records. Once complete we securely return the searchable PDF records to your Practice for filing into your patients electronic clinical record.

Key Features

- Fully managed service ensures there is no impact on staff time in preparing the Lloyd George records, as part of the digitisation process.
- Records are collected, catalogued, barcoded and boxed at a time to suit the Practice.
- Records are digitised to BS10008:14 standard and then returned securely to your Practice for direct attachment to the clinical record.
- Deep storage of the paper Lloyd George records in our secure off-site storage facilities forms part of the solution, giving complete confidence that the records are available to look at physically if needed and for quality assurance purposes during the digitisation process.
- noteSpace 'follow-on' service ensures that when the scanning is complete, new records coming into the Practice are captured on an ongoing basis rather than being added to staff workload.
- Secure destruction to BS EN 15713 standard or ongoing deep storage.
- iGPR included as part of the noteSpace Digital service to enable redacted Subject Access Requests to be securely produced.

New build, extension or redesigning your practice?

- Have you considered the possibilities if valuable space is not allocated to storing Lloyd George and A4 records?
- Generate revenue with new Clinical Rooms and by offering additional services.
- Improve patient access and waiting areas.
- Improve working conditions and facilities for your team.

Improve patient care by being able to access the complete, legacy medical record at the point of care delivery

Reduce administration time by removing the need to photocopy records for Subject Access and the need to manually locate paper records

Flexible payment terms
