

Willington Surgery is a long established medical practice based in Derby.

Committed to preserving and enhancing its good reputation for being a caring and innovative practice, it prides itself on providing good quality family medicine, delivered in a well organised and timely manner by well trained and motivated professional staff.

Whittakers interiors team spoke to Willington surgery as they were formulating ideas for the construction of their new prestigious surgery

A consultation was arranged with the Willington surgery project team. From the information provided we produced a proposal with several options of furniture ranges, together with samples and swatches. Out of three potential providers

Whittakers were chosen based on our proposal being the most suitable and competitive. Our furniture team created a project plan in conjunction with the Willington surgery project team to ensure that the install was on time and on budget. Our installation team and project team were on site throughout the installation to ensure that everything went smoothly.

" Moving Willington Surgery from one property to another was an exciting and also daunting challenge. After meeting several office furniture supply companies we choose Whittaker Office Solutions who helped to make part of the challenge very easy. Simon Whittaker visited us on several occasions and supported our thoughts with some very good ideas. He and his team provided a very professional service. Days before opening our new surgery, Whittakers delivered and assembled the furniture quickly and efficiently, leaving the building with all new lovely furniture and no rubbish to clear. I have no hesitation in recommending Whittaker Office Solutions. "
