

# SpeechWrite 360

Delivering efficiencies through voice

| MEDICAL

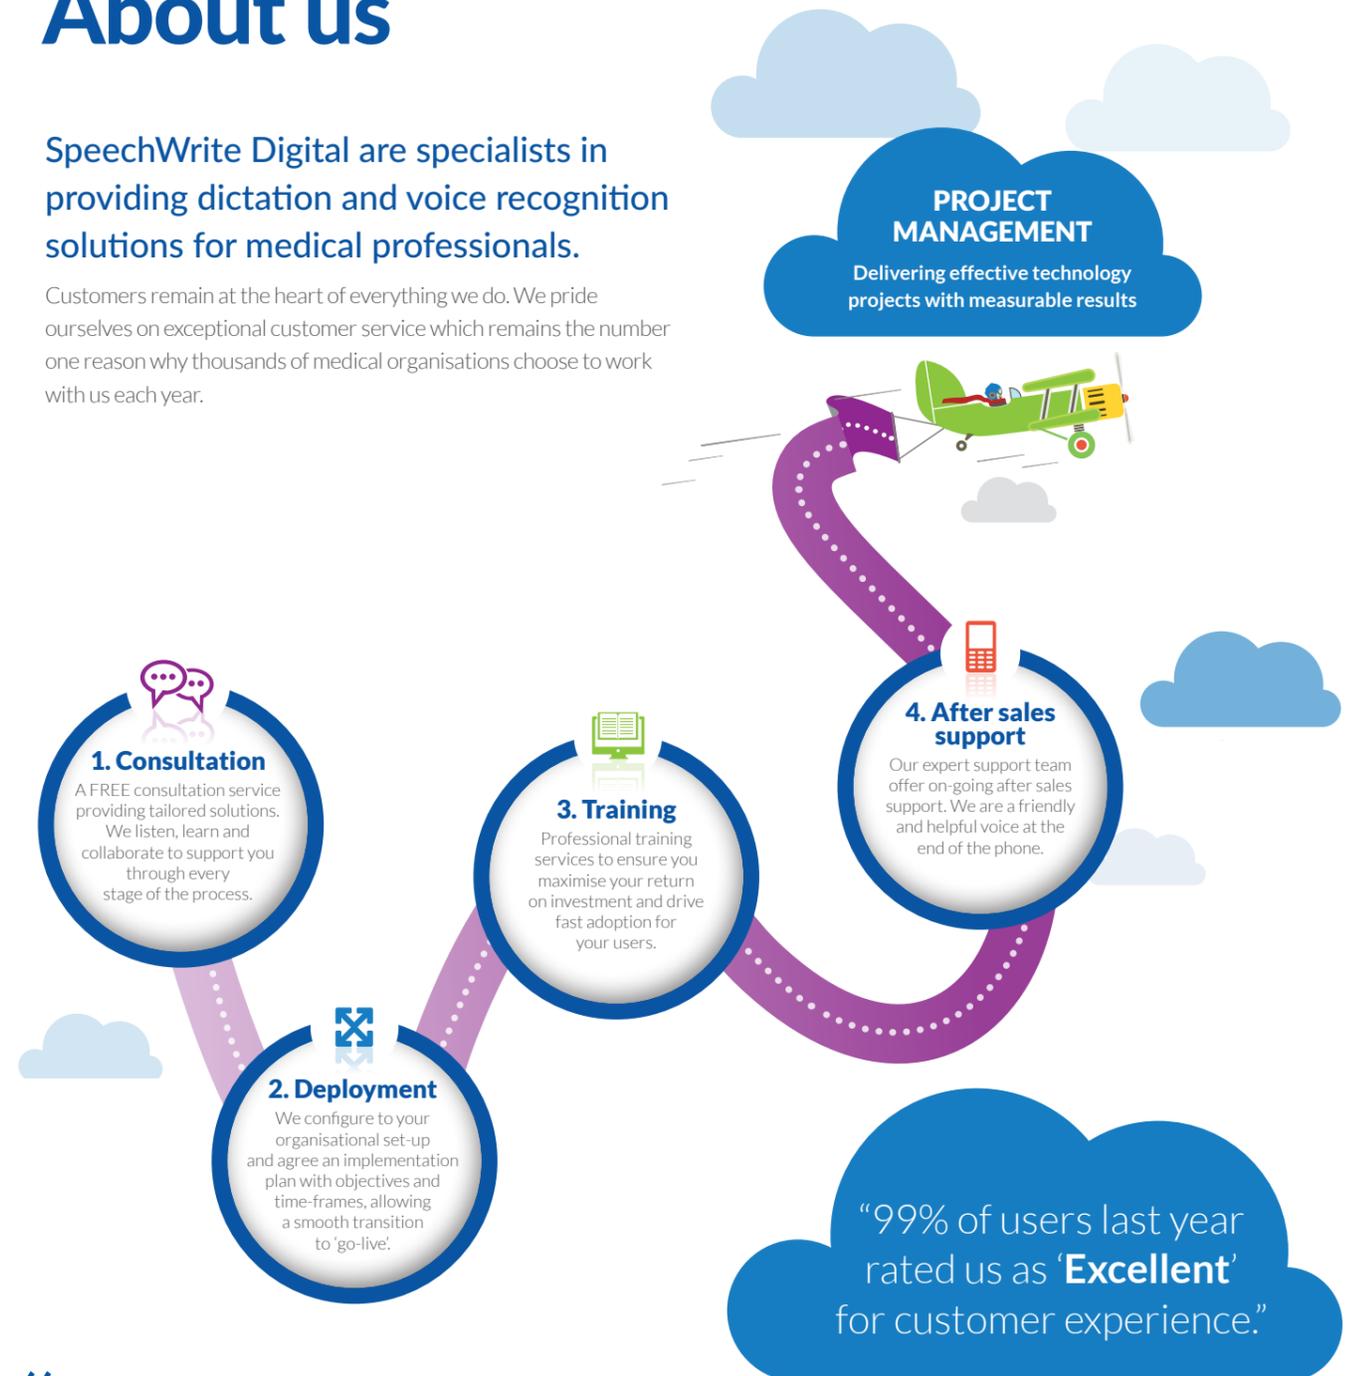

Our solutions allow clinicians to be more **flexible, efficient** and **productive** whilst also **reducing costs.**

# About us

SpeechWrite Digital are specialists in providing dictation and voice recognition solutions for medical professionals.

Customers remain at the heart of everything we do. We pride ourselves on exceptional customer service which remains the number one reason why thousands of medical organisations choose to work with us each year.

“Staff on the SpeechWrite support team don't assume that we are all really technically minded and make sure that we understand exactly how to make the system work best for us. ”

Lesley Middleton, Assistant Practice Manager, Baslow Road Surgery

“The new system has been a great addition to our health centre... the system itself provides very accurate, instantaneous dictation. ”

Sam Wallis, Business Administrator at Alcester Health Centre

## AN INTRODUCTION

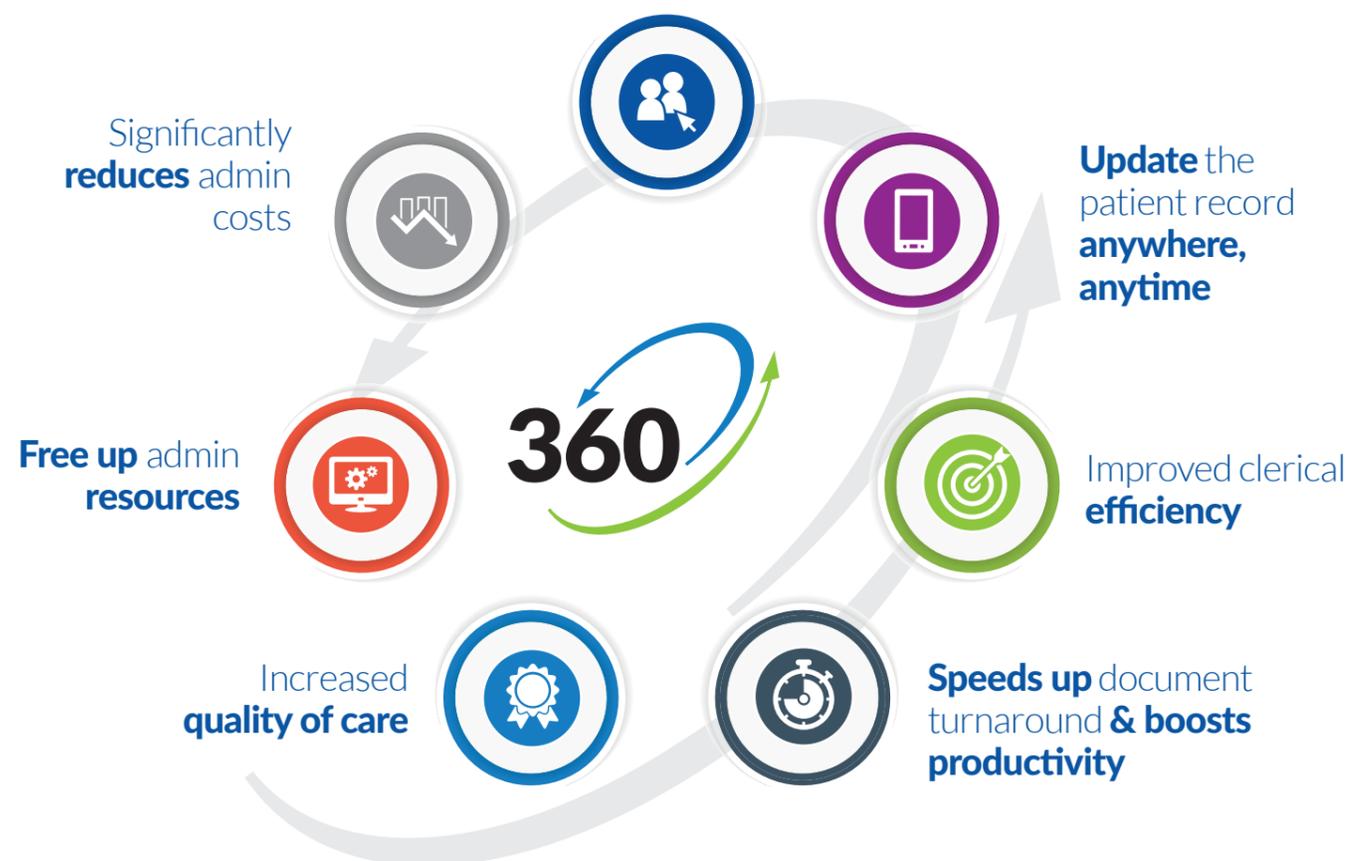

# SpeechWrite 360

SpeechWrite 360 is a state of the art voice recognition and dictation workflow solution designed to meet the flexible working needs of the modern day medical practice.

Dictate anywhere and manage the full document workflow with our mobile, tablet and desktop applications.

Medical notes, clinical correspondence and reports can be **reviewed, edited and signed** by clinicians **on the go**. We allow clinicians to **focus on patients** by **delivering solutions** at the point of care.

Spend **more time with patients**

## BENEFITS OF

# SpeechWrite 360

Streamline your medical documentation and admin process by using SpeechWrite 360. Seamlessly link authors and transcribers to speed up document turnaround and boost productivity for your practice.

### Simple billing process

Single quarterly bill which includes all services from SpeechWrite 360 including hosting.

### Quick and easy set up

Users can be set up in under 10 minutes ready to dictate or receive work.

### Flexible mobile working

Dictate using any current hardware device at any location at any time.

### Easy to use

Point your browser, log in and start using.

### No installation or costly infrastructure

SpeechWrite 360 provides a cloud first, mobile solution. It is easy to deploy, with no requirement to install software locally or provision expensive infrastructure.

### Scalable solution

Easily add and remove users or modules as your requirements evolve.

### Future proofed

SpeechWrite host, maintain, update and manage system and workflow admin, meaning you are always on the most up to date system and future proofed.

### Unrestricted data access

Access your data at any time without restriction.

### Highest Security Standards

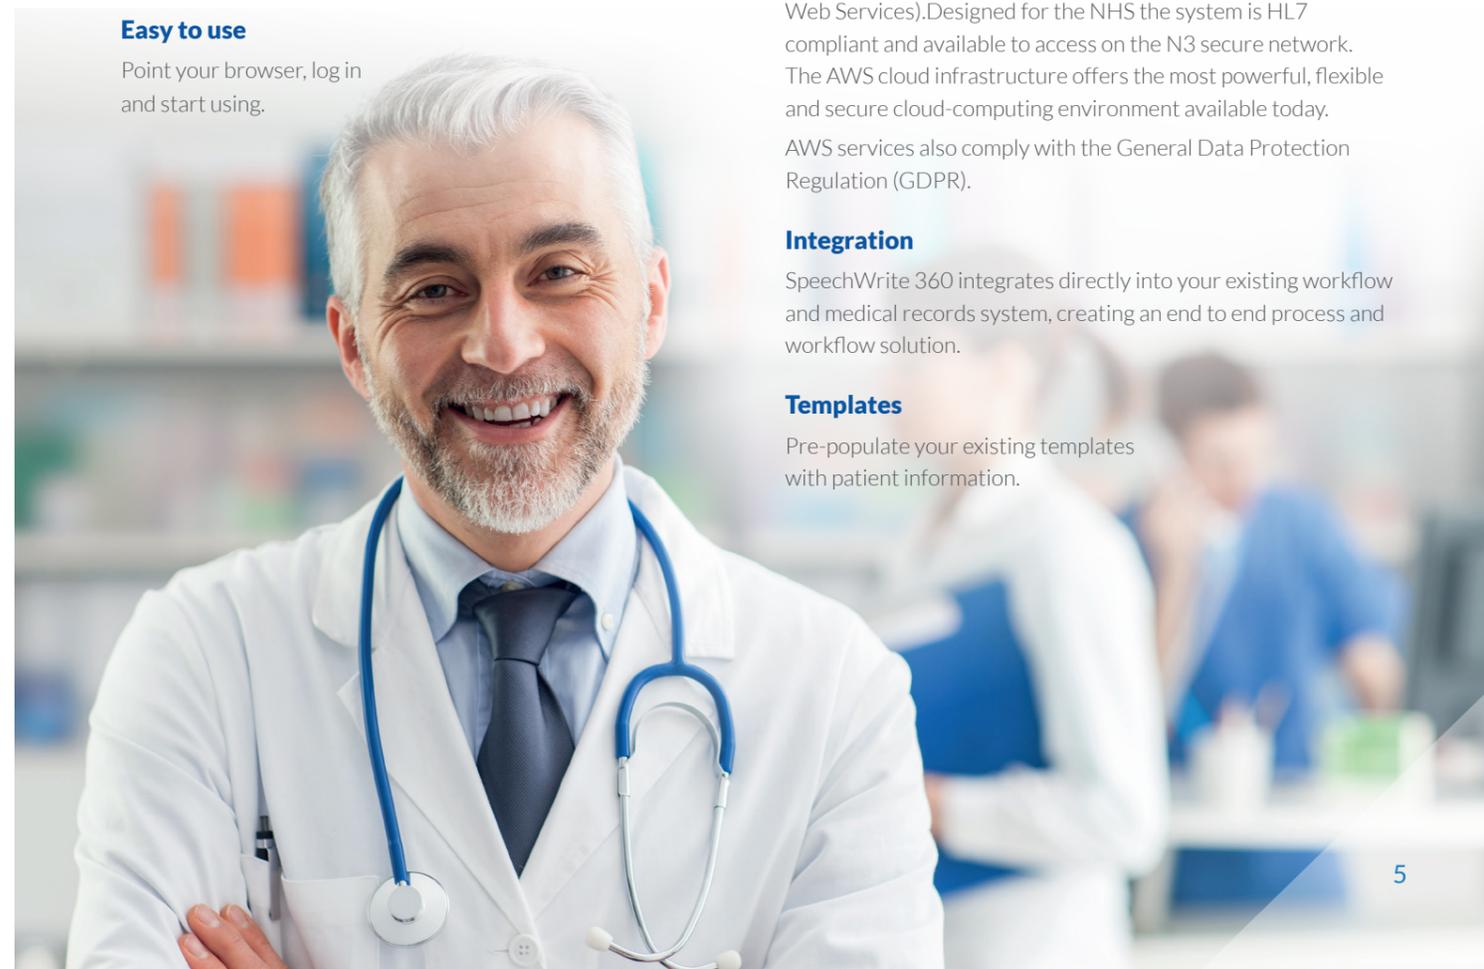

The Speechwrite 360 platform is UK hosted in AWS (Amazon Web Services). Designed for the NHS the system is HL7 compliant and available to access on the N3 secure network. The AWS cloud infrastructure offers the most powerful, flexible and secure cloud-computing environment available today. AWS services also comply with the General Data Protection Regulation (GDPR).

### Integration

SpeechWrite 360 integrates directly into your existing workflow and medical records system, creating an end to end process and workflow solution.

### Templates

Pre-populate your existing templates with patient information.

## INTEGRATION

SpeechWrite 360 easily and quickly integrates directly into your existing clinical system, creating an end to end process and workflow solution.

Seamless integration with SpeechWrite 360 and your medical records system significantly improves the efficiency and productivity of document creation.

## VOICE

SpeechWrite 360 brings you the next generation of voice recognition.

### See text appear as you talk

Fully integrated within your workflow solution, 360 voice allows you to dictate from any device, electronically sign, send in real time, track and edit your document all within the same system.

Furthermore, complete forms, send email, search the Web and dictate directly into any PC application including your medical records system, saving time and streamlining your internal processes. Authors are also able to automatically populate paragraphs of pre-defined text using one word pre-configured commands.

### Automated transcription

Transcribers receive completed documents that have been automatically transcribed into text, eliminating the need for typing. Transcription workflows are more efficient, saving time for transcribers and improving the turnaround time of medical documents.

## MOBILE

**Dictate, review, edit and approve on the go.**

Record dictations using the SpeechWrite 360 mobile app or telephony – anywhere, at any time and benefit from maximum security and reliability.

Using the mobile app medical notes, medical correspondence and reports can be reviewed, edited and signed by medical professionals on the go. SpeechWrite 360 allows users to focus on patients by delivering solutions at the point of care.

## SECURITY

The SpeechWrite 360 platform is UK hosted entirely in the cloud on Amazon Web Services.

The AWS cloud infrastructure offers the most powerful, flexible and secure cloud-computing environment available today. AWS is compliant with frameworks accreditations including ISO 27017 for cloud security, ISO 27018 for cloud privacy, PCI DSS Level 1, and SOC 1, SOC 2, and SOC 3.

AWS services also comply with the General Data Protection Regulation (GDPR).

## WORKFLOW

Our workflow management solution has been developed by and for clinicians, putting usability, security and organisational efficiency at the heart of the platform.

Dictate, track, edit and approve tasks on iOS, Android and desktop. SpeechWrite 360 delivers the full dictation workflow.

## REPORTING

Access real-time data driven metrics to provide insight into organisational workflows and drive meaningful process improvement.

### Keep track of your workflows

User dashboards allow managers to track their live workflows, whilst also delivering insights that help drive efficiency.
